

How to Read the ALL-Ways Top 10/Ranking Handicapping Report

Overview:

The Top 10/Ranking Handicapping Report is divided into two primary sections. The top portion of the report shows the top 10 performances for three selected handicapping factors. The bottom section shows horses in ranked order for sixteen different handicapping factors. This report can be customized using the CUSTOM/RANKING Module in ALL-Ways.

Notations:

* An asterisk before the horse's name indicates ALL-Ways designates the horse as a Dangerous Non Contender

(1, 2, 3, 4) A number in parentheses after a horse's name is the horse's actual finish position in the race

IMPORTANT: (###) The number in parentheses opposite the name of a handicapping factor shows the "PAR" figure for today's race

The Top 10 Section

The three handicapping Factors used in the "Starter Package" version of the report are:

BRIS Speed	The standard BRIS Speed Ratings
Hall Speed	The standard Hall Speed Ratings, similar to BRIS Speed, but are velocity based and normalized to the exact distance and surface of today's race. They are particularly strong for evaluating horses that are changing distance
BRIS Final Fraction	The BRIS Pace Rating from the 2 nd Call to the finish (Very strong for high priced closers)

Using BRIS Speed as an example, to arrive at the Top 10 Performance figures, ALL-Ways looks at the five most recent races run by every horse in the race. It then identifies the ten best BRIS Speed performances of all the horses in the field. A horse can make the list multiple times if more than one of its speed performances makes the top 10 list. For example, if there are ten horses in the field, ALL-Ways will look at the five most recent races of each horse for a total of 50 races. It then identifies the top 10 BRIS Speed figures achieved by the horses in these 50 races. Again, in virtually every case, several horses will make the list multiple times and, conversely, many horses will not have a "Top 10 Speed Performance".

The Column Headings are:

#BK	The number of races back. For example, a "2" means two races back.
+	A plus sign (+) by the #BK figure means the race was run 120 or more days ago.
SD	Surface and distance code: DS = dirt sprint, DR = dirt route, TS = turf sprint, TR = turf route aS and aR = All Weather Surface sprint and route respectively
CD	Track condition
SH	Quirin Race Shape: The first letter is the pace from the gate to the 2 nd Call. The second letter is the speed of the race. "F" = Fast, "P" = Par, "A" = Average and "S" = Slow. Example: A Quirin Race Shape of FP indicates a "Fast" pace to the 2 nd Call and a "Par" final time.
FIN	The horse's finish position in the race
ESP-QN	The horse's Running Style ("E", "EP", "P", "S") and Quirin Speed Points. Quirin Speed Points is a position factor that measures a horse's propensity to be on or up close to the lead at the 1 st Call. The rating ranges from eight points to zero points with 7 or 8 points indicating a strong propensity.

How to Read the ALL-Ways Top 10/Ranking Handicapping Report (Continued)

The Ranking Section

The Ranking Section of the report lists the horses in ranked order for each of sixteen specific handicapping factors. This report can be customized using the CUSTOM/RANKING Module in ALL-Ways.

Reminders:

- IMPORTANT: The number in parenthesis after the factor name is the “Par” figure for the race
- The 2/3 notation for handicapping factors means the figures are the average of the best two out of the horse’s three most recent performances.

Weighted Hall Total and Weighted BRIS Total

These figures are the Weighted Moving Averages of the horse four most recent races. The most recent race receives a 40% weighting, the 2nd race back is weighted 30%, the 3rd race back is weighted 20% and the 4th race back is weighted 10%. The “TOTAL” handicapping factor is the sum of the horse’s Early Pace Rating plus Speed Rating. These handicapping factors are a good measure of a horse’s current form.

BRIS Speed 2/3	Bris Speed, best 2 of 3
Hall Speed 2/3	Hall Speed , best 2 of 3
BRIS Back Class	Best BRIS Class rating for races similar to today’s race during the past year
BRIS Class	Overall BRIS Class Rating
True Class	Average BRIS Class Rating for similar races run during the past 120 days
SRTV Last	Daily Racing Form Speed Rating plus Track Variant
BRIS EP 2/3	BRIS Early Pace, best 2 of 3: Measured from the gate to the 2 nd Call
BRIS FF 2/3	BRIS Final Fraction, best 2 of 3: Measured from the 2 nd Call to the finish
BRIS Combined 2/3	BRIS Combined, best 2 of 3. The sum of the horse’s Early Pace and Final Fraction Ratings

Note: The Combined figures are calculated for each individual race. You cannot merely add the BRIS EP 2/3 and BRIS FF 2/3 numbers

True Dirt Speed	Average BRIS Speed for the same kinds of races in terms of sprint, routes and surface
BRIS Total 2/3	BRIS Total, best 2 of 3: The sum of the horse’s Early Pace Rating plus Speed Rating
BRIS Late 2/3	BRIS Late, best 2 of 3: The sum of the horse’s Final Fraction Rating plus Speed Rating
BRIS Prime Power	BRIS Prime Power, a comprehensive rating
Comprehensive	ALL-Ways Comprehensive, similar to BRIS Prime Power with added considerations

Note: The ML designation next to the Comprehensive Rating is the official Morning Line Odds
