

# BREEDERS' CUP CLASSIC CHEAT SHEET

## TACITUS

**PRO** Barn has won this race multiple times and this colt rarely misses a piece of the purse.

**CON** Routinely fell short in more winnable spots; this field much tougher than ones he's been facing.

## TIZ THE LAW

**PRO** Remains arguably the leading 3-year-old despite Derby loss; enters fresh.

**CON** Although new to Keeneland, both losses to date have come in Kentucky.

## BY MY STANDARDS

**PRO** Has run only one bad race in his career, a troubled trip in the 2019 Kentucky Derby.

**CON** Has form to find to turn the tables on Improbable and Tom's d'Etat, for starters.

## TOM'S D'ETAT

**PRO** Has been pointing to this race for more than a year; capable over this track and when fresh.

**CON** Owns just one G1 win against a much softer group.

## TITLE READY

**PRO** Owns multiple wins over this track and has never finished out of the money over it.

**CON:** Limited class and speed-figure power should make him an Arcangues-sized longshot.

## HIGHER POWER

**PRO** Career-best effort occurred over 10 furlongs, albeit more than a year ago.

**CON** A distant third in a softer renewal of this event last year; recent form doesn't inspire.

## GLOBAL CAMPAIGN

**PRO** Going good now and proved he could carry his speed 1 1/4 miles in the Woodward.

**CON** Pace scenario doesn't look at all favorable; this is the deepest field he's ever faced.

## IMPROBABLE

**PRO** Couldn't be racing any better with three coast-to-coast G1 wins; can seemingly win from anywhere.

**CON** Has won only twice in eight starts outside California.

## AUTHENTIC

**PRO** Barn knows what it takes to have a 3-year-old fire in the Classic, won the last time held at Keeneland.

**CON** Enters off two hard races in Kentucky Derby and Preakness; older rivals offer stiffer challenges than Swiss Skydiver.

## MAXIMUM SECURITY

**PRO** Champion is controversial, but has crossed the wire first in 11 of 13 starts.

**CON** Performance in the Awesome Again last time one of his duller efforts, perhaps a sign of regression.
